MyCareTeam™ Receives US FDA Clearance for Diabetes Management Software

MCT-Diabetes is now FDA-cleared and is immediately available to consumers and organizations on a monthly or yearly subscription basis directly from MyCareTeam

Acton, MA. – April 29, 2008 – MyCareTeam, Inc. has received clearance from the United States Food & Drug Administration (FDA) for its flagship diabetes management software product, MCT-Diabetes. MCT-Diabetes enables people with diabetes to securely upload blood glucose (sugar) readings from their glucose meter and communicate electronically with their caregivers.

MyCareTeam pursued the rigorous clearance process in order to provide its consumer base with an enhanced diabetes monitoring product that is cleared by the FDA. MCT-Diabetes is one of the first software-only diabetes management companies to receive FDA clearance in the United States.

“We are extremely pleased to be able to offer our customers an FDA cleared version of MCT-Diabetes”, said Jim Mingle, CEO of MyCareTeam, Inc. “This clearance means our customers can rest assured that our diabetes management software meets the same standards for accuracy, reliability, and safety as medical devices and instruments.”

MCT-Diabetes guides people with diabetes to make the required behavioral and medication changes supported by frequent feedback and input from caregivers. MCT-Diabetes offers a unique and personalized way to share and monitor blood glucose levels, keep track of medications, log blood pressure, track lab results, and build and maintain an exercise log. MCT-Diabetes also allows people with diabetes to invite individuals into their health-management support circle, and provides an interactive method for receiving feedback in the form of charts and graphs.

Because of MCT-Diabetes’ new classification as an FDA cleared software medical device, it will now be sold directly from MyCareTeam and select distribution channels. Monthly and yearly subscriptions are available. Visit www.mycareteam.com for more information.

About MyCareTeam, Inc.

MyCareTeam, Inc. was founded to provide software offerings that are designed to help people with diabetes to collaborate and manage their illness while reducing overall healthcare costs. The company's diabetes offering, MCT-Diabetes, has been successfully used for over five years by patients, doctors and nurses to dramatically improve the health and wellness in people with diabetes and reduce overall healthcare costs.
