MyCareTeam Teams Up with Sanvita for Special Diabetes Software Offer to Sam's Club® Members

Sam's Club members who purchase Nova Max® Monitors will receive a free six-month subscription to MCT-Diabetes

Acton, Ma. – May 7, 2009 – MyCareTeam, Inc., a leading vendor of Internet-based diabetes management software, has entered into an agreement with Sanvita to offer MCT-Diabetes to all Sam's Club Members. As part of this agreement, any Sam's Club member that purchases a Nova Max Monitor will receive a free six-month subscription to MCT-Diabetes.

MCT-Diabetes is a behavior modification tool that allows individuals with diabetes and their care providers to collaborate and monitor glucose levels across the Internet. The product facilitates collaboration, which improves the long-term management of diabetes. The intuitive, easy-to-use software application provides an opportunity for the patient to decide who (care providers, family members, and friends) can have access to the patient's data and communicate with each other. Patients who do not wish to share access with care providers can print reports and graphs and take them to appointments for review.

"We are thrilled to be able to offer such a great diabetes management package to Sam's Club members," said Jim Mingle, CEO of MyCareTeam. "Nova Max Monitor users will find MCT-Diabetes extremely beneficial to their overall health because it can be used to keep track of their glucose readings they upload from their Nova Max Monitor along with other important medical information."

About MyCareTeam, Inc.

MyCareTeam, Inc. was founded to provide software offerings that are designed to help people with diabetes to collaborate and manage their illness while reducing overall healthcare costs. The company's diabetes offering, MCT-Diabetes, has been successfully used for over five years by patients, doctors and nurses to dramatically improve the health and wellness in people with diabetes and reduce overall healthcare costs. MyCareTeam is headquartered in Acton, Massachusetts and the company's website is www.mycareteam.com.

MyCareTeam has integrated MCT-Diabetes with Google Health. Google Health allows consumers to enter and maintain their own basic medical data and electronically send that information to system which are connected to Google Health. MyCareTeam's diabetes management software, MCT-Diabetes, integrated with Google Health, will allow consumers to securely transfer diabetes related information to and from the Google Health medical data repository. The data can be transferred to any other medical applications that are also integrated with Google Health.

MCT-Diabetes is available directly from MyCareTeam on a monthly or annual subscription membership basis. Visit the company's website at www.mycareteam.com for more information.
